

SHAMEEL MAJEED

Full-Stack Developer | MERN Stack & .NET Core

shameelmajeed65@gmail.com | 0304-5875095 | linkedin.com/in/shameelmajeed | shameelportfolio.netlify.app

SUMMARY

Full-Stack Developer with 1+ year of professional experience delivering production-grade web applications using the MERN stack and .NET Core. Built and shipped RESTful APIs, JWT-secured role-based dashboards, and real-time enterprise systems supporting 100+ users across property management, e-commerce, and financial workflow platforms. Comfortable working across the stack, from optimizing React.js rendering performance to designing secure backend architecture, within Agile/Scrum teams.

EXPERIENCE

Associate Software Engineer — SID Software House

Lahore, Pakistan

May 2025 – Present

- Developed and maintained scalable full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) and .NET Core, ensuring clean architecture and reusable components.
- Improved React.js application performance and UI consistency by refactoring components and optimizing rendering logic, reducing unnecessary re-renders.
- Designed and implemented RESTful APIs using Node.js and .NET Core, enabling secure and reliable communication between front-end and back-end systems.
- Collaborated in an Agile/Scrum environment, contributing to sprint planning, daily stand-ups, code reviews, and on-time feature delivery.

Full-Stack Developer Intern (MERN Stack) — Corvit Network

Pakistan

December 2024 – April 2025

- Built and maintained full-stack web features using the MERN stack, resolving critical bugs and shipping UI improvements that strengthened system stability.
- Engineered scalable applications using modular architecture and reusable components, improving code maintainability and development efficiency.
- Optimized React.js performance by reducing unnecessary re-renders, resulting in faster UI response and smoother user interactions.
- Designed and integrated RESTful APIs, improving data handling and overall application reliability.
- Collaborated in an Agile/Scrum environment, contributing to sprint planning, code reviews, and delivery cycles.

EDUCATION

Bachelor of Science in Software Engineering

Lahore Garrison University — 2024

SKILLS

Programming Languages: JavaScript (ES6+), C#

Frontend Development: HTML5, CSS3, React.js, Tailwind CSS, Bootstrap

Backend Development: Node.js, Express.js, .NET Core, Firebase, RESTful APIs

Databases: MongoDB, SQL

Tools & Technologies: Git, GitHub, Postman, Swagger, JSON, API Integration, Debugging, Software Documentation

Software Design: UML Diagrams, Basic System Design Principles

Soft Skills: Teamwork, Problem-Solving, Communication, Quick Learner, Adaptability

PROJECTS

Tenancy Management System (Enterprise Property Platform)

- Developed an enterprise-grade application using ASP.NET Core 8.0 MVC and C#, automating lease and tenant management for 100+ units.
- Implemented JWT authentication and RBAC, ensuring secure access control and user activity tracking.
- Built real-time dashboards and RDLC reports to monitor lease expirations, occupancy, and property performance.
- Developed RESTful APIs and automated features including contract generation and email notifications (MailKit).
- Integrated financial modules with SAGE ERP for payment tracking, reminders, and cheque management.

Technologies: ASP.NET Core 8.0 MVC, C#, SQL, JWT, RBAC, RDLC, MailKit, SAGE ERP

Luxe Perfumes — E-Commerce Order Management

- Built a full-stack MERN application managing order lifecycles, returns, shipments, and real-time inventory tracking.
- Implemented JWT authentication and RBAC for secure, role-based dashboard permissions.
- Engineered RESTful APIs using Node.js and Express.js for efficient data processing and reliable backend operations.
- Built a responsive UI using React.js, Tailwind CSS, and Bootstrap, ensuring a seamless experience across desktop and mobile devices.

Technologies: MongoDB, SQL, Express.js, React.js, Node.js, JWT, REST APIs, Tailwind CSS

Sew Eurodrive — Enterprise Financial Dashboard

- Developed a full-stack enterprise dashboard using the MERN stack, integrating real-time financial data to streamline business processes.
- Engineered a multi-level approval workflow system to automate credit approvals, improving operational speed and data accuracy.
- Designed secure RESTful APIs for seamless, real-time data synchronization between the dashboard and core backend services.
- Architected a modular UI using reusable React components for user, department, and territory management.

Technologies: SQL, Express.js, React.js, Node.js, REST APIs, Bootstrap

HS Classified Ads Marketplace

- Building a modern, mobile-first responsive interface for a classifieds marketplace.
- Implementing reusable UI components using React.js and Tailwind CSS for design consistency and maintainability.
- Designing intuitive navigation including category browsing, product listings, and search interface.
- Developing interactive frontend features and state management to support a complete buying/selling workflow.

Technologies: React.js, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3, Responsive Design
